

With the industrial development at the national level, Asian countries have made economic development and played key roles in the global value chain. Importance of occupational health is also rising for protecting individual workers at the same time. In the symposium program, speakers will introduce their own country's occupational health profile including system, regulation and experience. Occupational health policy is important not only for preventing occupational disaster and accident but also for the productivity and profitability of a country. As each country has developed its' own policies considering working condition, culture and industries, the occupational health systems are different each other. By comparing each country's policies, audiences can understand the current situation and feature of each country's occupational health. In addition, speaker and audiences can share valuable experience and discuss the prospect of occupational health in Asian countries. This symposium can help creating decent work in occupational health aspect.
